

For Immediate Release

## International Governments Express Interest in the FF5000 Military Variant Aircraft

**SWANSEA, IL. November 19, 2009** – (FFAC) Freight Feeder Aircraft Corporation announced today that high-level briefings and negotiations are on-going with several international governments for the procurement of the FF5000 Military Variant Aircraft (FF5000MV).

Last week, senior officials from the South African Air Force (SAAF) invited FFAC representatives to meet at its Headquarters in Pretoria, South Africa, for extensive briefings of the FF5000MV and its strategic capabilities. These SAAF officials who oversee air transport & maritime systems were briefed about the abilities of the FF5000MV including its Troop Transport, Medevac, Mobile Hospital, Maritime Surveillance, In-Flight Refueling, Equipment and Cargo Transport capabilities. These meetings happen to offer alternative solutions to the SAAF after their recent decision to terminate a transaction to buy eight Airbus A400M military transport aircraft and to begin a search for a new solution to its military needs. [Click here for full story](#)

FFAC's Senior Military Advisor, Major General L.W. Svendsen (Retired), Stated: "We are very encouraged with the progress that is being made with the South African Air Force and its interest in the procurement of the mission specific FF5000MV aircraft. We look forward to providing the SAAF with this innovative military variant aircraft that they will need to fulfill their defensive commitments."

FFAC and its Associates have also had preliminary discussions with the officials from the U.S. AFRICOM and the Royal Australian Air Force (RAAF) about the acquisition possibilities of FF5000MV Aircraft. Several other international governments and humanitarian agencies have expressed interest in the FF5000MV since FFAC's inception in December of 2007.

### **About Freight Feeder Aircraft Corporation**

Freight Feeder Aircraft Corporation (FFAC) is a U.S. private corporation registered in the State of Wyoming. The FF5000 Freight Feeder aircraft is specifically designed to address a niche segment of the global air freight market, specifically the need for a new and effective containerized air transportation system requiring a regional turboprop-aircraft, specifically designed to economically transport containerized/palletized air shipments to and from the major international hub airports, worldwide.
